AGRICULTURAL ENGINEERING

The Journal of the

American Society of Agricultural Engineers

Index to Volume 13 — January to December 1932

Issues	Pages
January	1- 26
February	27- 56
March	57- 88
April	89-114
May	115-138
June	139-166
July	167-192
August	193-224
September	225-248
October	249-272
November	273-304
December	305-336

Agilbut, A. P.—Some factors affecting the economic use of tractor engines at part loads 73

Agricultural Engineer (Agricultural Engineering)

(See also American Society of Agricultural Engineers, Engineering, Extension, Research)

George Washington—America's first agricultural engineer 28

The Farm Bureau and agricultural engineering (editorial) 54

A reply to Mr. O'Neal's suggestions (correspondence) 81

Another university falls in line (editorial) 86

Agriculture's challenge to the engineer (The annual address of the president of the American Society of Agricultural Engineers) 169

The place of the agricultural engineer in agricultural extension work 175

Teamwork in an engineer's policy for agriculture 177

Engineering leadership as a policy for agriculture 205

Correcting misunderstanding (editorial) 220

The logical future development of research in agricultural engineering 227

Some of the economic aspects of an engineered agriculture 255

Agricultural engineering's future (editorial) 296

An engineer's policy based on point of view 312

The physical properties of soil of interest to agricultural engineers.. 324

Agricultural Engineering Digest — Pages 21, 51, 83, 109, 134, 161, 185, 219, 241, 265, 297, 328.

American Society of Agricultural Engineers

(See also Agricultural Engineering, Meetings, Necrology, Standardization)

The symbolism of the Cyrus Hall McCormick medal 133

A great annual meeting (editorial) 136

A welcome to agricultural engineers 173

First McCormick Medal award to Major Stout 174

Notes on the annual meeting (editorial) 188

Continued meetings (editorial) 296

Pennywise economy (editorial) 296

Anderson, E. D.—Tests of laminated bent rafters 11

Arthur, Dr. John M.—Artificial light and plant growth 288

Baird, R. W.—The operation of power machinery on terraced land..... 286

Baldwin, R. J. — The place of the agricultural engineer in agricultural extension work 175

Bartells, G. C.—The production and use of galvanized roofing sheets... 47

Baver, L. D.—The physical properties of soil of interest to agricultural engineers 324

Beet machinery development, Sugar... 120

Beresford, Hobart—
Floor heating for brooder houses.... 240
An engineer's policy based on point of view 312

Besley, H. Elmer—A new electric dairy utensil sterilizer 110

Blasingame, R. U.—Development of the potato harvester 237

Bodnar, George P.—Operation of rice temperatures 45

Boyd, Geo. R.—The refinancing of driers in California with low air drainage districts 258

Bressler, Raymond G. Jr. — Temperature gradient in milk cooled by direct immersion 230

Brooks, F. A.—Measurement of orchard heater smoke 149

Carnes, Arvy—Heating water by solar energy 156

Carney, Lawrence B. — Electric soil sterilization 95

Carter, Deane G.—
Some proposed standard measurements for kitchen equipment 42
An experimental poultry plant 44
Proposed standard design for kitchen storage equipment 67
Effect of machine method on stand of cotton 119

Clyde, Arthur W.—
A season's test of a hay drier 61
A study of tractor stop-hitches..... 75

Clyde, G. D.—
Methods of alleviating water shortages on irrigation projects 37
Water equivalent of snow (correspondence) 80

Corn planters, The Ohio fertilizer placement tests with 209

Cotton, Effect of machine method on stand of 119

Cotton production, Use of machinery in 99

Dairy Engineering and Equipment

The factory method of milk production 97

A new electric dairy utensil sterilizer 141

Temperature gradient in milk cooled by direct immersion 230

A temperature control index in dairy plant standardization 251

A new method of milk production... 313

Dehydration

Operation of rice driers in California with low air temperatures ... 45

Research problems in artificial drying of forage crops 45

A season's test of a hay drier 61

Results of 1931 artificial drying studies 69

Diesel engine designed for tractor service, A 14

Drainage

Underdrainage as protection of crops against drought damage 64

Ditch maintenance 107

Drainage and overproduction (editorial) 112

The cost of drainage pumping 123

Ditch cleaning experiments in Delaware 195

The refinancing of drainage districts 258

Drought

Underdrainage as protection of crops against drought damage 64

Probable frequency of serious nation-wide droughts in the United States 145

Duffee, F. W.—A planned engineered agriculture 275

Economics

(See also Management)

Fallacy of averages (editorial) 24

Current viewpoints on agriculture (editorial) 113

Agriculture and the depression 153

The relation of consumption, production, and distribution (abstract).. 159

Applying research results (editorial) 220

Some of the economic aspects of an engineered agriculture 255

The refinancing of drainage districts 258

A proposed engineering-economic policy for agriculture 278

Economic aspects of farm mechanization 307

Economic control of insects 317

Ekblaw, K. J. T.—The production and use of galvanized roofing sheets... 47

Serial
agri ref
S871
A2
V. 13, 1932

Electrification, Rural

(See also Dairy Engineering and Equipment, Dehydration, Lighting, Poultry)

Dependence on electrification (editorial) 24
Research in farm electrification..... 91
Electric soil sterilization 95
Electric motors for farm applications 105
A study of isolated electric plant costs 291
The economic control of insects 317

Ellison, W. D.—Ditch cleaning experiments in Delaware 195

Engineering

(See also Economics, Management)

Engineering experiment stations (editorial) 54
The engineer's responsibility (editorial) 86
Why Washington was an engineer (editorial) 112
Attitudes on engineering and social progress (editorial) 113
Engineers and their professional societies (editorial) 164
Professional meeting values (editorial) 164
The society officials' viewpoint (editorial) 164
Engineers and use of machines (editorial) 220
An engineering outlook (editorial).. 275
A planned engineered agriculture.. 275
A proposed engineering - economic policy for agriculture 278

Erosion, Soil

A method of studying soil erosion.. 101
Soil erosion control in Illinois 126
Efficiency of terracing machines ... 182
Controlling moisture, erosion, and flood water 208
The operation of farm machinery over terraced land 231
Engineers and the control of erosion 234

Extension

Individual service in house planning 6
An extension program in farm machinery 104
Farm building plan service (editorial) 112
The place of the agricultural engineer in agricultural extension work 175

Faber, Ben W.—Electric motors for farm applications 105

Fairbanks, F. L.—The ventilation of animal shelters 321

Feed Grinding

Characteristics of feed mill performance 31
A simple system for testing ground feeds 183
How to determine the quantity of air and air-horsepower delivered by a hammer mill fan 214

Fertilizer placement tests with corn planters, The Ohio 209

Fletcher, Leonard J. — Agriculture's challenge to the engineer (The annual address of the president of the American Society of Agricultural Engineers) 169

Forage Crops

Research problems in artificial drying of forage crops 46
A season's test of a hay drier 61
Field curing of hay as influenced by plant physiological reactions 199

Frost, Kenneth R.—Experiments in weed eradication by machine-applied chemicals 79

Galvanized roofing sheets, The production and use of 47

Giese, Henry—
Tests of laminated bent rafters ... 11
The engineer's responsibility (editorial) 86

Gordon, E. D.—Artificial drying of agricultural products 260

Gray, R. B.—Artificial drying of agricultural products 260

Hanson, Frank P.—Handling straw from the combine 319

Harvesting Machinery

A German "combine" development 35
A new design for combine cylinders 36
Development of the potato harvester 237
A combine reel for harvesting peas 316
Handling straw from the combine 318

Heaters

Measurement of orchard heater smoke 149
Heating water by solar energy ... 156
Floor heating for brooder houses .. 240

Herms, W. B.—A light trap with suction fan 292

Horton, Robert E.—Water equivalent of snow (correspondence) 80

Houses, Farm

Individual service in house planning 6
Some proposed standard measurements for kitchen equipment 42
Proposed standard design for kitchen storage equipment 67
Size of rooms in five-room, ready-cut houses 78
Size of rooms in architect's five-room houses 108

Humphrey, E. N.—A combine reel for harvesting peas 316

Huntington, Arthur — Engineering leadership as a policy for agriculture 205

Hurst, W. M.—
Research problems in artificial drying of forage crops 46
Artificial drying of agricultural products 260

Ionized air on day-old chicks, Influence of (abstract) 218

Irrigation

Methods of alleviating water shortages on irrigation projects 37
Water equivalent of snow (correspondence) 80
Head loss in flow through fine screens 144
Irrigation practice in the eastern states 265

Jacobi, Louis—Gear loading practice in tractor design 59

Jardine, James T.—Teamwork in an engineer's policy for agriculture.. 177

Jeffers, Henry W.—The factory method of milk production 97

Jones, Lewis A.—Engineers and the control of erosion 234

Jones, T. N.—Field curing of hay as influenced by plant physiological reactions 199

Kable, Geo. W.—Research in farm electrification 91

Kaiser, W. G.—Paving garden helps control weeds 259

Kane, Maurice—Pioneer farm machine designer 96

Kelley, M. A. R.—George Washington—America's first agricultural engineer 29

Kimbark, E. H. — Maurice Kane—pioneer farm machine designer .. 96

Kincer, J. B.—Probable frequency of serious nationwide droughts in the United States 145

King, James A.—A proposed engineering-economic policy for agriculture 278

Krueger, W. C.—The economic control of insects 317

Kummer, T. H.—The dynamic properties of soil—IV. A method of analysis of plow moldboard design based upon dynamic properties of soil 279

Lacy, H. E.—Stationary spray plants for commercial and farm orcharding 19

Lehmann, E. W.—Soil erosion control in Illinois 126

Lewis, M. R.—Head loss in flow through fine screens 144

Lighting

Measurement of spectral energy distribution for agricultural research 125
Operation of sunlight lamps in series 181
Artificial light and plant growth .. 288
A light trap with suction fan 292

Machinery (Mechanical Equipment)

(See also Dairy Engineering and Equipment, Dehydration, Electrification, Harvesting Machinery, Heaters, Standardization, Tractors and specific machines, crops and operations)

Mechanization, management, and the competitive position of agriculture 3
The mechanical manipulation of soil as it affects structure 7
Experiments in weed eradication by machine applied chemicals 79
Maurice Kane—pioneer farm machine designer 96
Use of machinery in cotton production 99
An extension program in farm machinery 104
Effect of machine method on stand of cotton 119
Sugar beet machinery development. 120
Efficiency of terracing machines ... 182
The Ohio fertilizer placement tests with corn planters 209
How to determine the quantity of air and air-horsepower delivered by a hammer mill fan 214
The operation of farm machinery over terraced land 231
A method of analysis of plow moldboard design based upon dynamic properties of soil 279
Economic aspects of farm mechanization 307

Management
(See also Economics)
Mechanization management, and the competitive position of agriculture 3
More farm size discussion (editorial) 54
Some factors affecting the economic use of tractor engines at part loads 73
Some farmers' week observations (editorial) 86
The factory method of milk production 97
Use of machinery in cotton production 99
Farmstead arrangement and its effect on operating costs 217
Speculation in work animals (editorial) 242
Experiments in farming (editorial). 266
A planned engineered agriculture... 275
A new method of milk production.. 313
Handling straw from the the combine 318
Toward farm profits (editorial).... 330

McAlister, J. T.—An extension program in farm machinery 104

McCormick Medal, Cyrus Hall
The symbolism of the Cyrus Hall McCormick medal 133
First McCormick Medal award to Major Stout 174

McKibben, E. G.—Some factors affecting the economic use of tractor engines at part loads 73

McPheters, W. H.—Cobblestone walls for buildings 147

Meetings (A. S. A. E.)
Pacific Coast Section elects officers. 55
Southern Section meets with southern agricultural workers 87
College Division (Advisory) Committee meets in Washington 114
Social and economic values emphasized at 26th annual meeting 189
Premeeting conferences well attended 191
Canadian Section organized 191
Technical division meetings reflect progress 231

Mervine, E. M.—Sugar beet machinery development 120

Miller, Harry—
Measurement of spectral energy distribution for agricultural research 125
Operation of sunlight lamps in series 181

Miller, M. Wayne—Wet litter in poultry houses 238

Muehleisen, Gottlieb — Controlling moisture, erosion and flood water 208

Neal, Jesse H.—
Underdrainage as protection of crops against drought damage .. 64
Moisture relationships of soils in situ 128

Necrology
Harry H. Barrows 166
Hugh Arbuthnot Brown 268
Ray Austin Graham 268

Nicholas, John E.
How to determine the quantity of air and air-horsepower delivered by a hammer mill fan 214
Temperature gradient in milk cooled by direct immersion 230

Nichols, M. L.—
A method of studying soil erosion.. 101
The dynamic properties of soil—
III. Shear values uncemented soils 201
IV. A method of analysis of plow moldboard design based upon dynamic properties of soil .. 279

Packard, Walter E.—Agriculture and the depression 152

Paints as protective coatings, Aluminum 236

Palmer, L. O.—Field curing of hay as influenced by plant physiological reactions 199

Peas, A combine reel for harvesting. 316

Potato harvester, Development of the 237

Poultry
An experimental poultry plant 45
Influence of ionized air on day-old chicks 218
Wet litter in poultry houses 238
Floor heating for brooder houses .. 240

Powers, Wilbur L. — Subsidence and durability of peaty lands 71

Pumping, The cost of drainage 123

Ramser, C. E.—The operation of farm machinery over terraced land 231

Randolph, John W.—Use of machinery in cotton production 99

Reclamation, Land
(See also Drainage, Drought, Erosion, Irrigation)
Reclamation in a federal land policy (editorial) 24

Reed, C. O.—The Ohio fertilizer placement tests with corn planters ... 209

Reed, Russell H.—Results of 1931 artificial drying studies 69

Research
(For procedures and results of specific researches see subject matter concerned)
Research in farm electrification 91
Measurement of spectral energy distribution for agricultural research 125
Research in the natural and social sciences of agriculture (editorial). 136
Applying research results (editorial) 220
The logical future development of research in agricultural engineering 227
Cooperative research (editorial) ... 242

Rice driers in California with low air temperatures, Operation of 45

Rightmire, Dr. Geo. W.—A welcome to agricultural engineers 173

Roberts, W. B.—Aluminum paints as protective coatings 236

Roofing sheets, The production and use of galvanized 47

Rosen, C. G. A.—A Diesel engine designed for tractor service 14

Schnellbach, Otto—A new design for combine cylinders 36

Schweers, Marvin F.—Farm building losses in Iowa due to wind 117

Scoates, Dan—
Size of rooms in five-room, ready-cut houses 78
Size of rooms in architects' five-room houses 108

Sexton, H. D.—A method of studying soil erosion 101

Silver, E. A.—
Characteristics of feed mill performance 31
A simple system for testing ground feeds 183

Slipher, John A. — The mechanical manipulation of soil as it affects structure 7

Smith, L. J.—Fallacy of averages (editorial) 24

Smith, R. M.—An experimental poultry plant 44

Smoke, Measurement of orchard heater 149

Soils
(See also Erosion, Soil)
The mechanical manipulation of soil as it affects structure 7
Subsidence and durability of peaty lands 71
Electric soil sterilization 95
Moisture relationships of soils in situ 128
The dynamic properties of soil—
III. Shear values of uncemented soils 201
IV. A method of analysis of plow moldboard design based upon dynamic properties of soil... 279
The physical properties of soil of interest to agricultural engineers. 324

Solar energy, Heating water by 156

Spray plants for commercial and farm orcharding, Stationary 19

Staebner, F. E.—Irrigation practice in the eastern states 264

Standardization
Hammer mill rating requirements.. 34
Some proposed standard measurements for kitchen equipment 42
Proposed standard design for kitchen storage equipment 67
A simple system for testing ground feeds 183
A temperature control index in dairy stable standardization 251

Stippler, H. H.—A German "combine" development 35

Storage equipment, Proposed standard design for kitchen 67

Stout, Major O. V. P.—First McCormick medal award 174

30201

Strahan, J. L.—
A temperature control index in dairy stable standardization 251
A new method of milk production.. 313

Structures
(See also Houses)
Tests of laminated bent rafters ... 11
Farm building plan service (editorial) 112
Farm building losses in Iowa due to wind 117
Cobblestone walls for buildings ... 147
Farmstead arrangement and its effect on operating costs 217
Aluminum paints as protective coatings 236

Sutton, John G.—The cost of drainage pumping 123

Tractors
A Diesel engine designed for tractor service 14
Gear loading practice in tractor design 58
Some factors affecting the economic use of tractor engines at part loads 73
A study of tractor stop-hitches 75
The elastic drawbar 293

Trullinger, R. W.—The logical future development of research in agricultural engineering 227

Tyler, A. G.—A study of electric plant costs 291

Ventilation of animal shelters, The .. 321

Vutz, Wm.—The elastic drawbar 293

Ward, Walter G.—Individual service in house planning 6

Washington, George
George Washington—America's first agricultural engineer 29
Why Washington was an engineer (editorial) 112

Water equivalent of snow (correspondence) 80

Weed Control
Experiments in weed eradication by machine applied chemicals 79
Head loss in flow through fine screens 144
Paving garden helps control weeds. 259

Whitaker, E. B.—Effect of machine method on stand of cotton 119

White, H. B.—Farmstead arrangement and its effect on operating costs 217

Wilson, M. L.—
Mechanization, management, and the competitive position of agriculture 3
Some of the economic aspects of an engineered agriculture 255

Wooley, J. C.—Efficiency of terracing machines 182

Yerkes, Arnold P.—
A reply to Mr. O'Neal's suggestions (correspondence) 81
Economic aspects of farm mechanization 307
